Computer Science

COURSE PROJECT APPLICATIONS & SOFTWARE OPTIONS

Step 1: Download and print Computer Science Project for reference.

COURSE GUIDE LINK	DESCRIPTION
	Learning guide of essential learning objectives for word processing, database, spreadsheets and internet basics (browsers and email) along with application assignments.

Step 2: Review and select a tutorial program that fits your circumstances/resources

PROGRAM LINKS	DESCRIPTION
	GCF Learn Free is completely free. There's no catch and no gotchas. To get started, decide what you want to learn. Known for Technology and Microsoft Office tutorials, so if that's what you're interested in you can just click those tiles from the homepage and be on your way.
	Choice of delivery options – Download, PC Disc or Train on the Web. Variety of single course, tutorial sets or multi-course purchase options. Video tour and free demo to help with your decision-making. Great option for advanced business, Adobe and web training options.
	Multiple LinkedIn Learning options for business, technology and creative courses at all levels. Complete and submit this form for a representative to contact you to discuss how learning online can benefit your organization.

Other Options: Use to add PowerPoint to core course guide or for convention preparation.

PROJECT LINKS	DESCRIPTION
	Additional options could include application assignments in presentations and web design that uses the project guide provided or, for events being prepared for student convention, follow closely the specific details listed in the Academics section of the A.C.E. Student Convention Guidelines.
